

DOORS AJAR IN MODERN HOUSE FOR INSPECTION

Is Last Word in Construction—Designed for Greater Comfort, Less Labor and Beauty Of Finish and Conveniences

Designed and planned from the inside, out, to provide greater comfort, less labor, better health, and yet at the same time placing a proper emphasis on beauty of construction and design, interior arrangements and conveniences. The Edmonton Bulletin's "Home of Tomorrow", erected at the corner of 102 avenue and St. George's Crescent will be thrown open for public inspection on Thursday, September 10th, at 2 p.m. to 10 p.m., and will be open daily during those hours, except Sundays. It is the last word in modern, low cost Canadian homes. The Dream Home Come True, and it will be open for inspection for the general public for one month at least, and longer if necessary.

Every Inch Room Is Utilized

From the outside it may appear to be on the small side, but once inside the visitor will see that rooms have a better relationship, one to another; that every inch of space has been conserved for useful purposes; that more attention has been paid to better lighting by day or night; that new standards of automatic heating and air conditioning have been introduced, and that full use is made of electrical equipment in performing tedious tasks quickly and efficiently. It is a modern fully equipped home, suitable for a family of four, the members of which can enjoy greater comfort, less labor, and better health as a result of the modern conveniences which have gone into its erection and equipping. It was built as The Bulletin's contribution toward solving Canada's unemployment problem by encouraging a revival of the building industry in Canada and at the same time, filling what is admittedly Canada's greatest need today, namely, the provision of low cost homes, modern and healthful in every respect, and at the same time within costs which can be met by the average Canadian family of moderate income.

MENT IN HIGH STATIONS LAUD BUILDING IDEA

Incentive To Housing Shown in Construction of Modern Building

Complete in every detail, ready for the critical inspection of Mr. and Mrs. Edmonton, The Bulletin's "Home of Tomorrow" will be thrown open to the general public on Thursday, September 10th, at 2 p.m. and from that time on, until officially closed in a month or six weeks time, it will be open for inspection from 2 p.m. until 10 p.m. daily, except Sunday.

Already thousands of Edmonton housewives and prospective home owners have visited the "Home of Tomorrow" during its construction. With keen interest, they watched the progress of the building from week to week, and now, fully furnished, equipped with the latest electrical appliances, air conditioned, C. A. Dunlop and absolutely the latest word in a modern model home, the "Home of Tomorrow" is now viewed again as a finished project.

And not only in Edmonton has the course of construction of the new home been watched.

MINSTER FRANCE CONGRATULATES BULLETIN
Keenly interested in The Bulletin's efforts to stimulate the building industry in Edmonton and Alberta, and well aware of the effect a revival of the construction industry across Canada would have on the general employment of men in the Dominion, the province, and the city have commended The Bulletin.

Lord Moyghn's Family Declines Burial in Abbey

LONDON, Sept. 9.—The family of Lord Moyghn has declined the offer of the family physician who advocated legislation to legalize "mercy deaths" today declined the honor of having him buried in Westminster Abbey. His son, the new Lord Moyghn, told Abbey authorities the family greatly appreciated the offer, but that the late baron had expressed a desire to be buried with Lady Moyghn in the family vault at Leam, his home.

Lord Moyghn died Monday, six days after the death of his wife.

Peace River Area Visited By Frost

PEACE RIVER, Sept. 9.—Frost of varying degrees struck this district last night, but whether it was heavy enough to do any damage to crops is not yet known. The frost was not sufficiently heavy this district to touch the shocked wheat and this is precisely why it is ready for threshing. In fact Thursday will see most of the wheat hammering out the grain. A considerable quantity of wheat has been threshed and is moving into the elevators.

Maureen O'Sullivan To Wed Saturday

HOLLYWOOD, Sept. 9.—Maureen O'Sullivan, screen actress, and John Barrymore, spectacular attraction, today would be married Saturday at Las Vegas.

Violations of Treaty Hinted

WASHINGTON, Sept. 8.—Claude Swann, secretary of the United States navy, asserted today that Japanese plans to retain 15,000 tons of over-age submarines would involve "a violation" of the London naval pact.

REWARD FOR HONESTY IS 5 PER CENT

GLASGOW, Sept. 8.—The reward for honesty was set today by a Scottish court at five per cent. Mrs. R. Lynn of Glasgow found two 128 notes (£108 each) on Argyle street in Dunoon. Britain, the navy chief said nothing would be done by the United States if the money was claimed by a ship's crew.

AGRICULTURAL PRODUCTION OF ALBERTA

	Field Crops	Root Crops	Fodder Crops	Dairy	Miscellaneous	Total

More than 600 million dollars of debts were created in Alberta prior to 1930. Read carefully the 10 years' record in the above table and note what happened under a dishonest "Sound Money" policy. While producers of real wealth received less than half the former value for their products the loaning institutions were privileged to collect two dollars (purchasing power) for every dollar loaned with interest added of 7%, 8%, 9% and 10%. Think it over!

REBELS OUTRAGED BY CASUALTIES

ADOLF HITLER NOW AIMS AT INDEPENDENCE

BARCELONA, Sept. 9.—Charges that Italy and Germany were aiding the rebel cause in violation of their neutrality pledges were renewed here today after the shooting down of an insurgent plane allegedly piloted by an Italian officer. The anti-Fascist militia of Madrid have declared the machine had been shot down by government anti-aircraft guns and charged that both Italy and Germany still were furnishing planes to the rebel forces. This situation cannot continue, the insurgents declared.

For every German or Italian plane delivered to the rebels, France would deliver one of its planes to Madrid.

Announces Four-Year Program Embracing Aggressive Colonial Demands

NUREMBERG, Germany, Sept. 8.—Chancellor Hitler today proclaimed his four-year program embracing aggressive colonial demands, aimed at the goal of making Germany economically independent of the rest of the world. The proclamation, sounded Sunday before 80,000 Nazi demonstrators at a four-day convention, declared the Fuehrer has decided to reorganizing the national economy and speeding the plan and production of all industrial and agricultural products.

WANT LABOR REPRESENTED ON C.N. BOARD

Urged in Resolution Passed at Convention of the Trades Congress
MONTREAL, Sept. 9.—Appointment of a Labor representative on the new board of directors of the Canadian National Railways was urged today in a resolution passed at the annual convention of the Trades and Labor Congress of Canada.

POOLS PROTEST WHEAT PEGGING

OTTAWA, Sept. 9.—Representatives of the western wheat pools today protested to the government against the pegging of wheat prices at 57 1/2 cents per bushel.

REWARD FOR HONESTY IS 5 PER CENT

GLASGOW, Sept. 8.—The reward for honesty was set today by a Scottish court at five per cent. Mrs. R. Lynn of Glasgow found two 128 notes (£108 each) on Argyle street in Dunoon.

FLYING BOAT FORCED BACK

NEW YORK, Sept. 9.—A leak in its cooling system forced the German mail ship Anselm to turn back today from the Azores after having completed 600 miles of its projected transatlantic flight to Port Washington, N.Y., via Bermuda.

Key Stammers In Net Semi-Finals

FOREST HILLS, N.Y., Sept. 9.—The tennis championship tournament today was decided by the semi-finals. The first semi-final was played between the American and the French player, and the second between the American and the British player.

NAVIGATION TO NORTH MINING AREAS PLANNED

\$66,000 to be Spent by the Dominion in N.W.T. and Yukon
OTTAWA, Sept. 9.—Improvement of transportation facilities into mining territories of the Yukon and North West Territories at a cost of \$66,000, was announced today by Hon. T. A. Crerar, Minister of Mines.

WANT LABOR REPRESENTED ON C.N. BOARD

Urged in Resolution Passed at Convention of the Trades Congress
MONTREAL, Sept. 9.—Appointment of a Labor representative on the new board of directors of the Canadian National Railways was urged today in a resolution passed at the annual convention of the Trades and Labor Congress of Canada.

POUND DUMPS TO NEW HIGH

NEW YORK, Sept. 9.—The pound sterling climbed upward to new heights today in world markets today as demand for the British unit from Continental Europe followed the clamoring of French Let workers for assistance to the Loyalist Spanish government.

King's Ears Not Ailing

VIENNA, Sept. 9.—King Edward VIII has received assurance from Prof. Heinrich Nussner, noted Viennese ear specialist, that his ears are in perfect condition and have not suffered a recurrence of the ailment which beset the monarch three years ago, a communique issued by the British embassy today.

The British sovereign, en route home from a Mediterranean cruise, visited the specialist for examination yesterday, as he did last year following a vacation, the communique stated. The specialist advised him last year to return within 12 months.

He Smashes Speed Marks

JOHN COBB noted fastest four world automobile records at Bonneville Salt Flats, Utah, on Wednesday.

REBELS SCOTCH THE WEEK FALLO

Money Wreath Accounts Available Outside Alberta

CALGARY, Sept. 9.—"There will be enough money on hand to redeem all the scrips properly certificated—and this will remove any lack of confidence in it," said Hon. W. Fallow, minister of public works, in an interview here.

For three days this week, starting September 10, the government will redeem certificates for scrips, wholesalers, retailers and others who have accounts to meet outside Alberta. Mr. Fallow will supervise arrangements for redemption. Scrips were first issued August 1 to the amount of \$250,000 to pay wages of roadworkers recruited from the ranks of the unemployed.

HAS GIVEN WORK

Scrip has done what was expected of it, the minister stated. It has given work and wages to those who needed it.

"We'll build roads on our own credit from now on," he said. "We have to dig out of the hole. I hope the set up will be fair. We've been free from this fall to get a good work done."

Mr. Fallow said the high wages paid from March to June were in bad shape and needed rebuilding. He said it was impossible to do everything at once but he would be a future road program carried out by means of Alberta credit.

BY CREDIT HOUSES

Chartered banks in Alberta would lose business in proportion to the success of social credit certificates, said Mr. Fallow. He said that the success of the scrip would be a future road program carried out by means of Alberta credit.

He believed many people with money in the banks would withdraw it to deposit it in Alberta scrip credit houses. The minister said it would be possible to have deposits of currency in the credit houses as well as credit accounts to use for purchases of things not produced in Alberta.

WANT LABOR REPRESENTED ON C.N. BOARD

Continued from Page One

of housing schemes throughout the Dominion and that the existing legislation be amended to encourage such schemes and developments by cities and municipalities at trade union rates of wages and financed through the bank of Canada.

What was described as failure of the Canadian government to remedy for unemployment or a more equitable means of distributing the necessities of life was also placed in a resolution from Toronto and Montreal.

ABOLISH RELIEF KITCHENS

Abolition of relief kitchens and a plan to allow for social work to enable them to be set in place was urged by the resolution approved unanimously.

Mr. Van Horne, of Edmonton, president of the cigar makers' international union of America, asked support of the Congress for the creation of tobacco factory workers' committees.

SIMILAR APPEAL

A similar appeal was made on behalf of the hotel and restaurant employees' international alliance and the bartenders' international union of America, by the president, Edward Flinn of Buffalo.

Storm Follows Toronto Protest

MONTREAL, Sept. 9.—Criticism of the executive of the Trades and Labor Congress from the District Labor Council, precipitated a storm at the congress headquarters today.

A resolution expressing formation of a "family compact" of the executive and declaring executive members would not be allowed to act as representatives to the International Labor Conference at Geneva was defeated but further motion from the platform to expel the Toronto representatives from the records was turned down by the convention.

Fleeing Guelph Prisoners Caught

GUELPH, Ont., Sept. 9.—Two men who escaped from the Guelph reformatory yesterday were captured and returned to the penal institution today.

They were, Geo. Simpson, 18, and Rudolf Lafontaine, 20, both of Ottawa, were caught by police in Acton, near here. They were taken as suspects at the reformatory.

Sterilization Urged

NEWMARKET, Ont., Sept. 9.—Newmarket town council last night passed a resolution urging sterilization of insane persons who are about to be discharged and whose habits indicate they are dangerous to society.

Court Denies Declaration Debt Exists

CALGARY, Sept. 9.—An Alberta court today gave a declaration that a debt was owing prior to 1932 can not be sustained in Alberta, courted under the recently adopted Debt Redemption and Settlement Act. Judge W. A. Macdonald ruled in court here yesterday.

Judge Macdonald gave his decision in the case of a Calgary printing company which sought to have the court declare that a debt, incurred in 1927, was owing it by a former client.

REBEL BOMBS FOUND TO BE GERMAN MADE

The alignment in Europe is revealing itself into Fascism vs. Democracy with Socialism and Communism, foreign observers declare. A proposed meeting between Chancellor Kurt Schuschnigg of Austria, Hitler of Germany, and Admiral Mikolajczyk of Poland, regent of Hungary, scheduled for September, may result in an anti-Red bloc of nations in central Europe, observers point out. Horthy, who inspired the conference, is said to be a strong foe of Communism, and if the tri-partite pact is signed, it will become a fact it is reported that efforts will be made to persuade Premier Mussolini of Italy

to disinterest himself in the countries of the Danube in return for Spanish territory. The Hungarian diet has already been in secret conference with Hitler in Bavaria. Such anti-Red bloc would have the support of Italy and possibly Poland. The map shows in black the three nations involved, with the two possible supporters shaded. If the Fascists succeed in winning Spain, another nation would be added to the bloc, making a mighty force against Czechoslovakia, Rumania and Yugoslavia. Hitler and Horthy are shown below, while Schuschnigg of Austria is shown at top.

ADOLF HITLER NOW AIMS AT INDEPENDENCE

Continued from Page One

was read by Adolf Wagner, the Bavarian Reich leader.

Wagner, who imitates Hitler's personality, asserted the Reich had been made politically independent in the past year, since the new Reich would be devoted to economic independence.

CONQUEST SUCCESSES

In the proclamation, Hitler declared the direction of Nazi policy was to secure the Reich's independence, and to secure the Reich's independence, and to secure the Reich's independence.

KING'S FORMER SECRETARY NEW HARBORS CHIEF

Important Appointment is Awarded to Vancouver Lawyer

OTTAWA, Sept. 9.—Completing a move initiated soon after taking office last October, the government today appointed a permanent harbor board which will have jurisdiction over principal Canadian ports in place of the individual harbor commissioners formerly existing.

Prime Minister Mackenzie King announced that Ralph Cameron, a native of Montreal, vice chairman of the board, and B. J. Roberts, assistant deputy minister of marine and canal, will be members of the three-man board.

NAMED MANAGERS

A provisional board was set up last fall and immediately the government today appointed a permanent harbor board which will have jurisdiction over principal Canadian ports in place of the individual harbor commissioners formerly existing.

SAVED OVERSEAS

Campany was born near Pictou, Ont., in 1894. He was educated at a college in Pictou, and served throughout the war in the medical service, and flew in a cargo plane for the Canadian army in 1914 and 1915.

THE HAGUE, The Netherlands, Sept. 9.—Prince Bernhard of Lippe-Biesterfeld said in a speech today he would marry Princess Juliana, here to the Netherlands throne, "within two or three months."

Cue King Is Now Missing

Ovation For ABERHART AT PEACE RIVER

Premier Urges Residents To Co-Operate With Government

PEACE RIVER, Alta., Sept. 9.—The Board theatre was jammed to the doors Tuesday night to hear Premier Wm. Aberhart and Hon. Wm. Cress. It only took a few minutes to fill the five hundred seats and a large number packed in to the lobby. However, an overflowed crowd anticipated and Main street was crowded with people who had gathered with people at the front speaker was hooked up.

The meeting was handled by W. J. Lamont, vice chairman, and Alex. McLeure as deputy mayor of the town, read an address of welcome which the government could hear its way clear at an early date. To gravel the Peace River-Edmonton highway and also to the town in curbing its own great source of worry and expense, the tariff and the tariff stream coming to the Peace River.

POLICE OUTLINED

He urged his listeners to give the government the full support of the province, and stated that his own efforts on his return to Edmonton.

EDMONTON'S LABOR MOTION FINDS FAVOR

Constitutional Procedure Urged by President Draper

By FRANK FLAHERTY
Canadian Press Staff Writer
MONTREAL, Sept. 8.—Canadian union men with a new freedom from firing a shot if they build up their organizations and use the ballot intelligently, the Trades and Labor Congress of Canada was told by P. M. Draper, of Ottawa, its president, as the fifty-second annual convention of the congress opened yesterday.

The convention got down to business on 238 resolutions forwarded by local and affiliated bodies after an opening speech by Mr. Draper in which he held progress along constitutional lines preferable to revolutionary or disruptive propaganda.

From Hon. Norman Rogers, federal minister of labor, the congress received an assurance that the government would listen to its representatives with a sympathetic ear.

RIGHT TO ORGANIZE

"That the workers must work out their own salvation to a large extent will be agreed by all, but the workers should be urged to fight against big business," said Mr. Draper. "The power of the state should be put back where it belongs, the right to organize with their fellow labor unions of their own choice."

London railway carmen secured adoption of a resolution on house building and public works should be financed with new currency issued by the government. The Council urged National Control of the banking system and the conversion of the pound.

Widening the scope of the Farmington Convention, the congress set to work to make it applicable to city dwellers living in their own homes was the substance of another resolution passed.

A proposal to make homes valued at less than \$2,000 exempt from municipal taxes was frowned upon. It was rejected after a brief debate in which Carl Berg, chairman of the resolutions committee, argued it would divide workers into "property-owning slaves and non-property-owning slaves" and might disrupt the labor movement.

GIRLS' SERVICES

Edmonton Trades and Labor Council found ready approval of a proposal that "Government financing for public works of all classes be done through the creation of new government currency guaranteed and redeemed by regular process of taxation."

After a sharp debate in which employers advised the minimum wage laws were scored a motion was passed to urge the Ontario government to amend the minimum wage Act so that "no girl's services may be dispensed with simply because she has become an experienced worker without the consent of the Minimum Wage Board."

PLYMOUTH, England, Sept. 8.

Sir Walter Citrine, secretary-general of the British Trade Union Congress meeting here, urged the delegates against a labor boycott of King George's coronation.

The boycott was proposed, together with a 24-hour general strike, as a protest against the new government regulations concerning compulsory insurance. Sir Walter strongly advised the 600 delegates to forego the idea and to enter into their political and social duties.

THOMAS SCOUTS LONDON CHANCE

NEW YORK, Sept. 8.—Norman Thomas, opening his campaign as Socialist candidate for United States president last night, criticized his attack upon labor's Non-Partisan League for Roosevelt and appealed to all workers to vote the straight Socialist ticket.

In a speech prepared as a criticism of labor movements in the present campaign, Thomas referred to the office for the next four years and predicted London would get fewer "organized labor" votes than Mr. Hoover in 1928.

"The course Roosevelt himself would take in the election," said Thomas, "is to take a Metropolitan Opera house audience. Depends far more upon what we can do for him than upon the black cheque that labor's Non-Partisan League would give him."

Man Charged With Attacking Woman

HAMILTON, Ont., Sept. 8.—George Brown, 17, was charged with assaulting a female, following his return to Hamilton yesterday. He was arrested in suburban Toronto after this morning in connection with a charge against a woman named Mrs. Addie Nichol. The case was set for trial in court.

The 38-year-old widow was found by her son, Malcolm, in a serious condition when he returned to their farm a few miles south of here. A search was made but found when the young farmer was reported missing.

Joan Blondell Is Free To Marry

LOS ANGELES, Sept. 8.—The final freedom of Joan Blondell was complete today. Superior Judge Douglas Edmunds granted the blonde film actress' application for a final divorce decree. The actress specialized on whether Mr. Blondell soon will marry Dick Powell. Her name has been linked romantically for many months.

SURVEY PARTIES TO FORMULATE ROAD PROGRAM

Works Minister Says No Actual Work Till Next Year

Engineering parties will be sent out this autumn to survey specified main highways sections with a view to an early drafting of next season's program. Hon. W. A. Fallow, minister of public works, declared on Wednesday, following his return from a several days inspection trip in the southern part of the province.

"But, no action will be taken on the highways until next year," he said.

The minister had inspected work going on to the east of Calgary, as well as the main No. 1 highway from this city as far south as Macleod. He also inspected the highway from Calgary to Banff.

NOTHING NOW

"I was getting an idea of what should be done. But you can rest assured nothing will be done until next year," said the Minister. "I have not yet decided what to do this year and decide what has to be done and then, during the winter, we can draft our program. By this method, with the plans prepared in advance, we can get down to work at an early date in the spring."

HIGHWAY BUSY

Asked regarding the new stretch of highway between Calgary and Banff, the minister said that "this is a wonderful piece of highway. There is lots of traffic on it, which indicates the value from a tourist traffic point of view. It is a high-class highway and gives a good impression of what should come from having 1,000 miles of such highway."

The minister said that such work as was now under way would be completed by the end of the year. It is known the minister will finish a winter project of a highway from McMurray to Goldfield.

DOPED POLICE CHIEF'S REPLY

PETROLIA, Ont., Sept. 8.—Chief Constable Harry J. Crapper, former member of the Regina Rough Riders football team, whose resignation has been asked, issued a statement today relative to his absence from duty Sunday and inferring he had been doped. The committee suspended the chief yesterday.

When the chief failed to report Sunday, Mayor Braybrook ordered Night Constable Fowler to investigate in the East End, where Crapper's car allegedly was parked throughout the day. The chief, found asleep in his home, was removed to the house.

Chief Crapper's statement said: "Sunday morning I entered a residence in connection with a complaint. The people were having breakfast and I accepted a cup of coffee. From that time I have no recollection until I was awakened at 10:30 at night. On Sunday I had no alcoholic drink."

Crapper, chief for about four and a half months, was superintendent for a few years ago of the Regina grain station.

Ings, Whitney, Old Westners, Dead

NANTON, Alta., Sept. 8.—Former rancher who came west by prairie schooner from Charlottesville, D.R.I., in 1882, Fred Ings, 74, died Tuesday.

Son of John Ings, prominent Charlottetown banker, ship-owner and publisher. Mr. Ings during the rebellion rode the range to protect his cattle from the depredations of Indians.

Col. Ernest Ings of Charlottetown was a brother.

Another pioneer rancher, David J. Whitney, 77, who came west the same year as Mr. Ings, died in hospital at Medicine Hat Tuesday. He was a native of Kingston, Ont.

Paralysis Scourge Spreads At Sault

SAULT STE. MARIE, Ont., Sept. 8.—Reports of three more cases of infantile paralysis brought the total in this district today to five. The cases reported today were total paralysis of the left leg and foot. The infant the baby show might be called off if the situation becomes serious.

With an efficiency comparable to other motors.

The basic design of the motor is a relatively simple. Three curved metal mirrors focused the sun's rays on a glass tube containing a black liquid of special chemical composition.

At 100 degrees Fahrenheit by the concentrated beams, the fluid passed through a boiler which sent enough steam to run the small engine.

Dr. Abbott foresees special use of the invention in arid regions where sunshine would be "on tap" at virtually all seasons. Irrigative sun motors might be used, he said, for pumping irrigation water, refrigeration, air conditioning and cooking.

His guests at the demonstration mentioned the possibility of giant installations in desert countries where the sun's energy into electricity to serve distant cities.

LAST WINTER TAME: COMING ONE IS WILD

BOAZ, Alta., Sept. 8.—Walter Roach, 50-pound weather prophet of Sand Mountain, came to town today, bringing with him the first "sign" of winter in this north Alberta sector.

Cattle's visits generally are accepted by folks hereabouts as a herald of approaching cold weather.

The six-foot-two Cagle, making his annual round of the country, winter clothes, paused to predict that "last winter was a mild one compared to the one coming up."

He said it was his earliest fall trip in 10 years. He placed odds for specially-made size 14 overalls and three sets of heavy duty shirts. Overcoat coats are out of the question, the thrifty Cagle said, so he'll wear two suits of overalls and two union suits to combat the extreme cold weather he predicted.

LILLE STRIKE MOVE SPREADS

LILLE, Sept. 9.—Thirty thousand striking textile workers occupied factories here today.

The strike movement has not yet spread to the other big manufacturing centres nearby, such as Roubaix, Tourcoing, and Arras.

Lille was the scene of the sharp and longest strikes in the May-June period of labor unrest.

The strikers demand a 10 per cent wage increase. The dispute involved the election of workers' delegates.

Gandhi Reported On Way To Recovery

BOMBAY, India, Sept. 8.—Mahatma Gandhi, Indian National leader, today was reported to be getting favorably, despite a slight increase in temperature.

Physicians said he was suffering from a simple fever, first apparent last week.

SPLIT SECOND COST 6 LIVES

SCOTTSTOWN, Que., Sept. 8.—Six lives would have been saved had Leo Trak's automobile stopped a split second sooner, a coroner's jury heard yesterday from witnesses who saw a train sweep four men and a woman and child to death at Medford in the morning.

Juryman found a verdict of acquittal.

dental death after learning how the one carrying seven persons rolled almost to a dead halt by the mark as the freight's whistle blew for the crossing.

Witnesses said that as the car came to a virtual standstill its front end projected slightly into the path of the train. As the driver accelerated it to clear the tracks, it squar

Turtles will live longer out of the water, if placed on their backs. Others, the weight of the shell compresses their internal organs.

400 Million U.S. Issue Greatly Over-subscribed

WASHINGTON, Sept. 8.—Secretary Morgenthau announced last night the United States treasury offering of \$400,000,000 of 20-25 year 2 1/2 per cent bonds had been nine times over-subscribed. Closing the doors of the issue, he described the financing as "a great success."

He reiterated previous statements that "continually growing confidence" in government credit had enabled the treasury to float a 20-25 year issue at 2 1/2 per cent interest.

During the past year, the treasury has successfully lengthened the term of its bonds without increasing the interest rate.

CANADIAN NICKEL in the Home

Blasted from the SUDBURY NICKEL MINES comes this Silvery Tub for your New Washer

THE RATTLE OF HIS DRILL reverberates through the timbered chamber in the Frood Mine half a mile beneath the earth's surface. Drill after drill bites into the ore wall. Then, as he and a thousand other wage-earners bend their way to the hoist which lifts them above this great mineral store-room, at the end of the shift, the charges are fired and avalanches of broken ore tumble to the floors of the various stops.

Ten thousand tons of ore are frequently raised in a single day from the Sudbury Nickel mines. This ore when smelted, refined and distributed to this and other lands for use in industry and homes, brings a constant stream of new wealth to Canada.

The towns of Sudbury and Port Colborne prosper because the scores of new uses for Nickel developed by International Nickel's research and sales departments keep the mines, smelters and refineries operating at capacity. Nor

is this prosperity confined to Sudbury and Port Colborne. A thousand factories in all parts of Canada find a steady market in the great

Nickel industry for machinery, equipment, supplies, food, clothing, boots and shoes, timber and practically every item of commerce. Railroads derive an immense amount of freight from Canada's Nickel mines.

And the products made from Nickel and Monel Metal bring efficiency and economy in every walk of life. Leading makers of washing machines are using Monel Metal tubs on their finest models. These silvery tubs are solid metal, will not rust, nor chip, nor crack and are uncorroded by soaps and bleaching solutions.

Write for free copy of "The Story of Nickel" an interesting booklet dealing with the history and development of Nickel.

Wedding Vows Are Pledged In St. Marks

Solemnized before an altar beaming with gladioli and roses, and beneath a floral arch, the wedding of Christine Graham Fleming, only daughter of Mr. and Mrs. C. F. Fleming and William Henry Rutledge, took place on Saturday evening, in St. Mark's Anglican church, where the wedding vows were pledged before the Rev. Canon C. A. Clough, who has been christened as a child, and was admitted to the Anglican faith. Rev. C. Story read the marriage lines at the ceremony which took place at eight o'clock.

The bride, who was given in marriage by her father, was a charming picture in a gown of ivory satin, fashioned on long classic lines, and her length sleeves draped to the elbow. A standup ruff around her neck, and a wide collar of orange blossoms. Her veil was of English tulle was arranged over style with orange blossoms, and she carried a bouquet of pale pink roses and maidenhead ferns.

Miss Connor Taylor, niece of the bridegroom, was a graceful bridesmaid in a bouffant gown of pale pink organza and white picture. Her bouquet was pale pink carnations and ferns.

The bridesmaid was attended by her brother, Mr. Walter Rutledge, and the ushers were Mr. Shervood Taylor and Mr. Jack Fleming.

Mr. Algonquin Taylor, officiating at the wedding music for the procession and recessional. During the singing of the register, Miss Morda Forstman sang, "I Love You Truly." More than fifty guests were present later at a reception arranged at the Rose room of the King Edward hotel.

To receive with the bride party, Mrs. Fleming, mother of the bride, were a graceful gown of navy blue crepe had a corsage of pale pink roses. Mrs. J. Bullock, mother of the bridegroom, was a charming figure in a flowered ensemble with corsage of roses. Rev. C. Story, proposed the toast to the bride, which the bridegroom responded. After a brief hospitable talk, Mr. and Mrs. William Rutledge will be at home on the South Side.

PRaise WArms HeArts of the "PRESS BOYS"

NEW YORK, Sept. 8.—The gentlemen of the press came in for a bill of sartorial praise recently from one of the American man's severest critics. It came from Miss Ethyle Campbell, London style authority who said last year American men were the worst dressed of any nation.

When she arrived today she was a little more charitable, and she told two reporters who interviewed her that they were "well turned out."

She said the chief trouble with American men is that they do not take the trouble to match their shirts and shirts with their shirts and shoes.

Ms. G. R. A. Rice is at home again from Seattle, Vancouver and Victoria, on a trip along the Olympic peninsula.

Who's Who Is Married at Fall Wedding

Wearing an exquisite gown of ivory satin, fashioned on long classic lines, and her length sleeves draped to the elbow, the bride, who was given in marriage by her father, was a charming picture in a gown of ivory satin, fashioned on long classic lines, and her length sleeves draped to the elbow. A standup ruff around her neck, and a wide collar of orange blossoms. Her veil was of English tulle was arranged over style with orange blossoms, and she carried a bouquet of pale pink roses and maidenhead ferns.

MISS MARY E. CRAWFORD, M.A.

Member of the National Council of the C.C.F. and treasurer for the provincial organization, who last year was selected as C.C.F. candidate for West Edmonton. As a brilliant orator, and keen, far-seeing political worker, Miss Crawford has been in the front ranks of the C.C.F. in 20 years of residence in Edmonton, where her forceful personality and qualities of leadership have made her a leader in many fields of activity to which she has devoted her life. She is a member of the National Council of the C.C.F. and treasurer for the provincial organization, who last year was selected as C.C.F. candidate for West Edmonton. Praise Given To Bulletin Home

MEN IN HIGH STATIONS LAUD BUILDING IDEA

Continued From Page One

Bulletin for its initiative in sponsoring the construction of "The Home of Tomorrow" in this city.

"I have learned of the model home which the Edmonton Bulletin has built, and of the other efforts which The Bulletin is making to encourage the building of low cost homes," intimated Hon. Charles A. Dunning, minister of finance at Ottawa, to whose department the administration of the Dominion Housing Act is entrusted.

"The Dominion Housing Act was passed by parliament with two major objectives: first, to encourage the building of homes, particularly for persons in the low and middle income groups; and second, to stimulate building construction in order to accelerate general business activity and absorption of unemployment."

"During the depression of the years there was practically a cessation of private construction activity, and a very substantial proportion of unemployment has been concentrated in the building trade and the industries depending upon them. We cannot expect normal restoration of business activity and sound employment conditions without a revival of the construction industries which depend upon long term investment."

PROVIDE METHOD FOR BUILDERS

"By providing a method whereby a mortgage loan up to eighty per cent of cost or value is available to the prospective home owner on a five per cent basis, The Housing Act has sought to overcome the obstacles of high interest rates and lack of equity money which were retarding building activity. These obstacles are gradually being overcome."

"During the last few months our efforts have been particularly directed to encouraging the building of low cost homes, and our recent architectural competition was designed to encourage first class architects to apply their skill and ingenuity to the problem of the economical design of such buildings."

The results of these efforts, including the detailed designs, have been made widely available to prospective home owners through the country.

PARTICULARLY INTERESTED

"It was for this reason that I was particularly interested in housing of the Bulletin program and I desire to congratulate you on the efforts which The Bulletin has been making to interest the public in the solution of the problem of low cost housing."

F. W. Mearns, M.A.I.C., Housing Administrator of the Department of Finance at Ottawa, and directly in charge of the working out of the Dominion Housing Act, is another official who has been visiting The Bulletin program with interest and who has sent a congratulatory message to Edmonton.

"The Bulletin is to be congratulated upon its efforts to stimulate small house construction by erecting a model home in Edmonton," writes Mr. Mearns.

CANADIANS KNOW ABOUT SPECIFICATIONS

"The average Canadian does not usually buy from blueprints or specifications. In purchasing his automobile, for instance, he sees the finished article and he usually likes to make his selection after an examination of several competing vehicles. He may consult the specifications for a number of types of automobiles but it would be difficult for him to make his purchase on the basis of specifications only. It is all the more difficult in the purchase of a home."

"Most Canadians know a good deal about what constitutes specifications for a good automobile but unfortunately they have not been similarly educated in regard to specifications for a sound and durable home. When the Minister of Finance issued Minimum Standards of Construction and Memorandum Specifications for use in connection with houses built under the Dominion Housing Act, he had in mind the desirability of encouraging to make the Canadian public 'house-conscious' just as they are today 'car-conscious'."

Despite the efforts which have been made in this direction however we have still a long distance to go before the average man can visualize from a set of plans just what the completed arrangement of his house will be."

"I have read, therefore, with great interest the program of The Edmonton Bulletin and I congratulate it upon the completion of the model home. It should greatly increase the interest of your public in housing construction generally and particularly in the economical design of low-cost homes. We are, I think, reaching the stage where depression psychology is beginning to wane and the public is becoming increasingly willing to make long-term commitments. The program of The Edmonton Bulletin therefore seems to come at a most opportune time."

CONSTRUCTION IS OF MODERN TREND

"I regret that I have not had the opportunity to visit the model home which you have completed but I gather that the style of architecture which the Bulletin has chosen follows somewhat along the modern trend in house design where the effort is made to eliminate unnecessary and costly ornamentation to provide the desired accommodation and usual amenities with the greatest economy and to secure aesthetic effect by simplicity and naturalness."

"The plan of the model home is similar in interior arrangement to that shown in one of the winning designs submitted in the recent

Plan Is Lauded

PREMIER ABERHART

COMMISSIONER GIBB

JOHN BLUE

Dominion Housing Act Architectural Competition, a simple livable plan which provides for all the necessary amenities for the average Canadian family.

"In creating an example of just what can be accomplished in the building of small houses The Edmonton Bulletin is doing its part in contributing to better homes and better times, and they are to be congratulated on their enterprise and public spirit."

LOCAL OFFICIALS LAUD IN PHRASE

Premier Aberhart, Mayor J. A. Clarke, K.C., Commissioners Mitchell and Gibb are among other officials who have been watching the building of the model home with interest. They have commented on the enterprise as follows:

Premier William Aberhart: "I hope the plan given and initiative shown by The Bulletin will be the forerunner of a building boom. I am sure that no other activity is more beneficial to a wide circle of workers than home-building. In that more people are directly and indirectly affected. The many trades touched by building and the many sources of material supply tapped are indicative of the extent to which money circulates through the economy."

End Roofing Expense For Many Years to Come . . .

SIDNEY 'Weather-Felt'

Keeps Your Home Cool
In Summer - Warm In
Winter.

When building materials are being considered a wall and ceiling installation of Sidney 'Weather-Felt' will add very little to the total cost. But it will add considerably to the ray warmth of your home and every winter you will save on fuel bills. Sidney 'Weather-Felt' is applied like tar paper, but it is a much heavier material providing the damp-proofing of two coats of asphalt with an inner insulation of wool felt.

DUROID

A PERFECT ROOF FOR EVERY TYPE OF CONSTRUCTION

Many modern styles of home architecture, such as the Bulletin's "Home of Tomorrow", call for a flat, built-up roof. In such cases complete satisfaction is assured when a Duroid 20-year Bonded Roof is specified.

For the pitch roof the ideal finish is a covering of Duroid Slate Surfacted Asphalt Shingles. They offer a choice of many beautiful colors. . . colors which are absolutely permanent because the surfacing material is a natural crushed rock. These Duroid Roofs are leakproof, sparkproof and enduring for the life of the building.

Kitchen Proves Transformation Old To Modern

Appliances on Every Hand Make Housewives' Dream of Ease Come True—Cook Becomes Lady in Her Own Domain

Making for greater livability, for health, for cleanliness and efficiency, electricity plays a large part in The Bulletin's "Home of Tomorrow," and visitors to this model home at the corner of 102nd avenue and St. George's Crescent will be able to see an electrified home in the fullest sense of the word, for General Electric engineers have planned this small home in every detail.

Consider the transformation of the old-fashioned kitchen into a beautiful, all-electric kitchen where work becomes play. Take a peep into the basement and see the wonderful electric laundry appliances which make another housewife's dream come true. Likewise the living room and bedrooms offer new conceptions of home livability. In every room General Electric contrivances permit of more efficient lighting—more convenient use of up-to-the-minute appliances—greater cleanliness—and all without sacrifice of appearance, but rather with an added attractiveness which must be seen to be appreciated.

THINGS THAT COUNT

It's the little things that count in the modern home. Little things like conveniently placed switches, to avoid the necessity of crossing a dark room to turn on a light, or conveniently placed outlets to enable the mistress of the house to make full use of electrical appliances in every room.

Little things like having 3-way switches for hall lights so that lights can be turned "on" or "off" from both upstairs or down with equal convenience; or a convenient outlet in the hall for a vacuum cleaner. Little things like having floor lamps placed in the room to read the paper or to use the easy chairs or the lounge table, and your radio exactly where you desire it, with a combination power outlet, and aerial connection. Little things like additional outlets so that you can use an electric cleaner without disconnecting any of the fixtures, or in the dining room, having plenty of wall and floor outlets for the toaster, percolator, waffle iron, sandwich toaster and other table appliances.

Little things like wiring and plug for electric clocks installed out of sight in a garage light that can be turned on and off from the outside lights in the basement so arranged that they are controlled by handy switches and that basement steps are well lighted to avoid accidents.

And in The Bulletin's "Home of Tomorrow" the General Electric engineers have taken care of the "little things."

CINDERELLA KITCHEN

Take the Cinderella kitchen where "cook" becomes a lady. Where kitchen is no work at all because she has at her command all the useful electrical servants.

In The Bulletin's model home the kitchen is no longer a woman's "workshop." Rather it is a magic sort of place where the mistress of the house presides in button-and-press—the work is done. Everything that can be done electrically is done that way. As a result the lady of the house is a lady in more than name; she has time to live—even though she doesn't have a maid. The Bulletin servants make this possible.

The Hotpoint hi-speed electric range has many features, specially designed to save time, effort and money. All of the heat released by the Hotpoint Calrod elements is concentrated on the cooking. The Thrift Cooker saves on current cost too, because it cooks stews, bakes, boils or cooks entire meals on 100 watts. And the automatic oven temperature control saves electricity. These and other advantages make Hotpoint the lowest cost electric cooker.

CHEAP AND CLEAN

And not only the cost element is there—there is also the element of cleanliness.

No more grimy kitchen walls and curtains in The Bulletin's model kitchen—no more blackened pots and pans when you cook with a Hotpoint electric range. It's as clean as sunshine and fast too—amazingly fast—for Hotpoint's Calrod heating coils cook as fast as food will cook, while the automatic timer and temperature control gives you hours of freedom from the kitchen, for entire meals can be cooked in your absence.

And you can be certain of results when you cook with a Hotpoint electric range. There are no cooking failures. Foods cooked the Hotpoint way are more delicious, for fruits and vegetables retain their own natural juices and beautiful vitamin, white

positive automatic control of the heat in the Hotpoint oven enables you to roast or bake perfectly without watching.

There are other labor saving contrivances also, such as the illuminated cooking top, sliding oven shelves, warming drawer, buffet working top, and a fast revolving the most exacting cook could wish for.

AUTOMATIC REFRIGERATION

The General Electric refrigerator of the model home is also the last word in lowest cost refrigeration coupled with the highest point of efficiency. It saves on food costs, saves on current costs and saves on convenience features of a refrigerator. Here is a partial list of those conveniences—automatic interior lighting; sanitary stainless steel freezer, cold control. 8-speed freezing speeds; foot pedal door opener; convenient A-Dial; covered space saving dishes; sliding and telescoping shelves; all steel cabinets; nuttles; ice trays, vegetable freshener; handy water bottle; reversible bottom; ample tall bottle space; ice tray release and powered with the famous G.E. sealed-in-socket mechanism that uses 40 per cent less current.

LIVING ROOM AMENITIES

The living room is also a model of convenience and utility. In the home of tomorrow the living room and dining room, are frequently treated as one. In a small home it is not necessary to devote space to a separate room when that room is only used three hours or so out of the twenty-four.

The living-dining room is so arranged that no waste steps are necessary. Mother can spend more of her time at the table, less going to and from the kitchen. The space is available for living as well as dining. And of course the equipment of this room is tremendously important—radio, lamp, television clock, and the many table appliances.

IN THE BEDROOMS

And there are the General Electric equipped bedrooms. It takes more than four walls to make a Most women have heard of an electric kitchen. But an "electric bedroom" sounds strange. Nevertheless the right electrical equipment can go far toward making the

before, one of the most attractive rooms in the home, and in "The Bulletin" "Home of Tomorrow" G.E. engineers have excelled themselves.

Not merely in the bigger things like G.E. air conditioning or the G.E. house ventilator that draws the heated air out and brings the cool outside air in—but in the smaller comforts like reading lights over the beds in exactly the right position—adequate lighting for the dressing table and in the clothes closet—Telexon electric alarm clock needs no winding—and electric curling iron.

Little things like these count for a whole lot in making a bedroom and bathroom really comfortable, and add to the beauty of the outfit.

GENERAL ELECTRIC EQUIPMENT

Features the New

EDMONTON BULLETIN
"HOME OF TOMORROW"

You will be delighted with the many modern electrical conveniences installed by Canadian General Electric in the new "Home of Tomorrow" sponsored by the "Edmonton Bulletin". This home, located at the corner of St. George's Crescent and 102nd Avenue, and built by E. Litchfield, will be open at 2 p.m. Thursday, Sept. 9.

ALL-ELECTRIC KITCHEN

Every woman will be enthusiastic about the General Electric kitchen with its G-E Refrigerator—G-E Hotpoint Automatic Range—Telexon Electric Clocks—G-E Ventilating Fan—G-E Lumiline lighting under wall cabinets over working surfaces—and Model Metal-sink. Here, with such efficient electrical servants, the preparation of meals becomes a distinct pleasure.

G-E AIR CONDITIONING

Heating worries have been ended by the installation of a General Electric Gas Furnace with day and

night temperature and humidity controls. In winter, a G-E Air Conditioner will circulate clean, humidified air, ensuring a healthful, refreshing atmosphere in which to live. The Gas Furnace also provides domestic hot water at low cost.

SCORES OF ELECTRIC SERVANTS

Throughout the entire home, General Electric planned wiring and lighting add to comfort and convenience—and permit the occupants to enjoy every advantage of "living electrically."

Through your G-E dealer, Canadian General Electric will gladly help YOU plan your new home, or modernize your present home, so that you too may enjoy the advantages of these many electrical conveniences.

Men In High Places Laud Building Plans Promoted By Bulletin

Continued from Page 11
building. The all results in increased purchasing power to the people. At the regular session of the house last winter, we passed legislation, complementary to the Dominion Housing Act and so far as we are concerned the way lies open to a building program in this province.

Mayor Joseph A. Clarke, K.C., "The Bulletin's Home of Tomorrow" has given great impetus to the home-building movement in Edmonton. I've watched construction in this model dwelling with great interest as I show a radical departure from the stereotyped form of home. It has been designed to economize space and yet provide adequate accommodation for those who will occupy the premises. And it is the last word in convenience—a really model home. Designed and built to show the average home-owner what can be done in modern construction it is a welcome surprise to Mr. and Mrs. Billington. But its greatest value to the community is the incentive it has given to prospective builders who want a suitable home within the range of the average man's pocket book. Citizens should take advantage of the opportunity to visit The Bulletin's Home of Tomorrow."

Commissioner David Mitchell: "The question of housing in these days is one of prime importance. Revival of the building industry in the Old Country is essentially due to the construction program launched by the government and later sponsored by private enterprise. Any steps taken to stimulate employment and to achieve a better standard of home construction is welcomed. It is to be hoped that the Dominion Housing Act will be modified to make possible its operation in Alberta, for Edmonton is particularly in need of an extensive home-building program. Construction of dwellings is one industry which has a far-reaching effect on many lines of business and I hope that The Bulletin's model home may be a step toward the revival and development of the building industry here."

Commissioner Robert J. Gibb: "It appears difficult to get the finance institutions to extend the benefits of the housing scheme to Western Canada and on that account any initiative taken by The Bulletin model home may be a step toward the revival and development of the building industry here."

population noted during the past five years particularly indicates the necessity for a large number of new residences combining the factors of greater comfort and convenience at reasonable cost. The Bulletin's initiative in this matter is to be commended."

John Blue, secretary-manager of the Edmonton Chamber of Commerce: "The Bulletin is to be commended for making a practical demonstration of the federal housing scheme. Two years ago the Chamber erected a model dwelling that gave a great impetus to the proper construction and furnishing of the modern home. I am confident that The Bulletin's home will exercise a similar beneficial effect upon the growth and improvement of Edmonton's residential districts."

"The new home is rather unconventional design," he added, "but it is admirably constructed for our climate, and therefore should serve as an example to many people who feel the need of reconditioning their old homes or building new ones."

"The most important contribution The Bulletin home will make to this city is that it will relieve our streets of that dead monotonous and unattractive character of homes when they were built by speculating real estate dealers years ago. The Bulletin home will enable the ordinary citizen to have a standard of what a satisfactory modern dwelling should be."

The Chamber official stated that there were many signs that Edmonton awaited a building boom in the near future, if only the hesitancy of insuring corporations could be overcome.

Indiana Dogs Win Manitoba Stakes

PIERSON, Man., Sept. 8.—Air Pilot Sam, white and liver pointer, owned by L. D. Johnson of Evanville, Ind., and handled by Ed Farrier of Union Springs, Ala., yesterday won the all-age stake of the Dominion bird dog trials near this south-western Manitoba town.

Second place was won by the pointer Wincinco, owned by Jacob France of Baltimore, Md., handled by C. H. Harris, Chimes Mississippi Jack, owned by Col. B. C. Goss of Cleveland and handled by George Payton, Michigan City, Miss., placed third.

Air Pilot Sam, which won the Saskatchewan championship at

Moore-Jaw last week, captured first place Tuesday with a fine exhibition in a second series trial against the pointer, Farmwood Yankee, owned by U. M. Fleischmann, New York.

The stake had 31 starters. The

judges were Dr. T. W. Shore of Boonville, N.C., and H. C. Sutter of Kansas City, Mo.

The one-cent magenta-colored stamp issued in British Guiana in 1886 is considered by philatelists to

be the most valuable stamp in the world. Women on American farms each work an average of 64 hours a week, with some of them working as many as 77 hours.

MEN IN HIGH STATIONS LAUD BUILDING IDEA

Continued from Page 16
Leone H. Steinhilber, secretary, Edmonton Builders' Exchange. "Business thrives when builders are busy, it being conceded that under normal conditions the construction industry is one of the country's largest employers of labor."

"The ramifications of the industry are so widespread that it is no mere saying that when it flourishes, work and wealth and happiness are

to be found throughout the land. "The depression has caused perhaps 400,000 men and women to be without steady employment, who would have been engaged under ordinary circumstances in some capacity connected with the construction industry."

A. J. Brown, president, Edmonton Builders' Exchange and Managing Director, W. H. Clark Lumber Co. "Of late there has been a very definite upward trend in construction. This cannot be viewed otherwise than as a fore-runner of a genuine revival of major proportions."

"Immigration of a household where diverting money from direct relief to this purpose would re-open normal channels of employment. Industrial activity would be accelerated, payrolls increased and the charge upon the community for maintaining its jobless proportionately decreased."

HOME BUILDING REVIVES HERE, REPORTS SHOW

One Hundred New Dwellings Valued at \$129,000 Erected This Year

Reversal of the home-building industry in Edmonton is clearly shown in figures released today

by the city building department, which reports the new dwellings erected this year with a total value of \$129,000. Of this number, 11 permits issued were for houses valued at \$1,000 or more, their average value being \$10,818.

The figures for the first eight months of the year, 24 permits totalling \$437,200 being issued by the department as compared to 23 permits totalling \$152,581 for the corresponding eight months of 1935.

Building men are hopeful that with fine weather prevailing people here will be more inclined to erect new homes before the winter sets in. They point out that building materials are cheap at the present time, while there is a large number of men engaged in the construction of new homes who need work.

Ready To Fly

Baroness Eva von Blizen-Fineck, Swedish noblewoman, and Kurt Björkwall, noted Stockholm commercial pilot, are pictured beside the Bellanca airplane in which they plan to leave New York in about 10 days on a trans-Atlantic flight to Stockholm, Sweden. The baroness, a pretty blonde, is wearing shorts, introducing a new fashion note for women flyers. She is an expert pilot and the mother of a 6-year-old boy. The Swedish flyers have been tuning their ship at Roosevelt field and are now ready for a favorable opportunity.

BUILDING AT FT. MURRAY GIVING WORK

Radio Station and Separate School Big Construction Projects

FORT MURRAY, Sept. 9.—The erection of several new buildings at Fort Murray is temporarily relieving the unemployment situation in the settlement.

Costing approximately \$7000, two buildings, a combined office and operating building, and a transmitter building are under construction by the Pools Construction Co. of Edmonton, for the Royal Canadian Signals. The completed buildings will house new wireless equipment for the local Signals detachment. They are expected to be completed this fall. Part of the building is directing the work.

The new \$500 R. C. Signals school, under construction by H. Ducharme, local contractor, is expected to be completed early next week. Meanwhile, school-children are being accommodated at the Roman Catholic Mission.

Murray's first separate school will contain two rooms and a large cloakroom. The building will be approximately 30 by 90 feet, with the school board are Mr. H. MacDermid, F. L. O'Grady and H. L. Leduc.

Other projects absorbing local labor are the construction of new drainage ditches and the improvement of roads, under the direction of Andy Smith, public works foreman.

The new drainage ditches take the water away from the business section of the settlement, running directly to the Murray River. Work on the roads entails filling old ditches and making electric light poles to a new location to clear the new roadway. When completed the road through the built-up section will be wide and level, with the electric light poles running down the centre.

It was recently reported that 80 per cent of American manufacturers are dependent on agricultural products.

Portuguese Queen To Wed, Says Rumor

PARIS, Sept. 9.—Rumors circulated today and former Queen Victoria of Portugal, deposed with the late King Manuel in 1920, would marry Count Douglas, a Swedish nobleman, formerly in the service of the Portuguese court.

Before the ceremony can take place the reports stated the count must have his first marriage annulled and embrace the Catholic faith.

Baron Tweedsmuir Now Indian Chief

LETHBRIDGE, Sept. 9.—Baron Tweedsmuir, residing in Wileston National Park and Carlton yesterday, was named Chief Eagle Head of the Blood Indian tribe of the Blackfoot confederacy in a ceremony at St. Paul, Minn., on the Blood reserve.

The French minister of public works has decreed that henceforth all automobile headlights shall be yellow instead of white, the former being less blinding to the eyes.

MODERN HOME WILL INSPIRE ALL BUILDERS POPULATION NOW IN NEED OF QUARTERS

The Bulletin's "Home of Tomorrow" is a most interesting and attractive addition to the residential section of Edmonton, according to Mrs. R. C. Marshall, president of the Independent Order of Daughters of the Empire.

"The Bulletin to be congratulated," Mrs. Marshall says, "on the contribution it has made to the architecture and construction of homes in this city."

"Builders in Edmonton may have been fairly criticized for their lack of initiative in introducing the more modern ideas in the building of houses and I am certain that the exhibition of ultra-modern ideas, both in the building itself, its construction and interior equipment, will prove a source of much inspiration and encouragement to the builders and the home planners themselves."

Too much cannot be said for the plan of the "Home of Tomorrow" which is a great consideration in the use of space, light and heat, all of which are important factors in houses in our part of the country, where the greatest convenience and accommodations compatible with the minimum cost of construction and space are to be desired.

"The house in which the Alberta Housewife spends a month of her life and should be of the utmost importance and deserves the best of both worlds and what the Home of Tomorrow will show, apart from the general impression which all new houses should give, is that it will provide much food for thought."

ATTRACTIVE WAY
"It demonstrates to the architect the way the house of the future can be brought to life by the use of modern materials and methods of construction, and by providing a charming and most interesting home."

ELECTRICITY IS MODEL HOME'S SUPREME RULE

Continued From Page 15

Electricity is the supreme rule in the "Home of Tomorrow" and is the basis of all its modern appliances which make a home really modern and comfortable. In the Bulletin's "Home of Tomorrow," the modern air conditioning plant is also a feature of the Bulletin's model home. No more sweating of walls, more odorous, more dust on furniture, no more waiting of draperies, no more drying of furniture, no more joints loosening and cracks appearing in floors and workbenches because of lack of humidity.

Air conditioning, The Bulletin's "Home of Tomorrow" will be a home of health. Fewer colds, fewer fevers in the air, less dust to cause work, no stagnant air to make you feel drowsy and lifeless, piano rays, carpets will last longer, draperies and curtains will wear better and look better; your hair and skin will not dry out. Health, comfort and pocketbook all benefit by the G.E. air conditioning plant.

AUTOMATIC FURNACE
And in the basement the G.E. automatic gas furnace, without a single moving part in wear or trouble, maintaining a steady even heat, day and night work in perfect order, without any attention, with G.E. thermostat control and electric clock attachment which automatically changes from day to night temperature settings at selected times, adds to the livability and cheerful conditions of the "Home of Tomorrow."

G.E. new ironer, that save laundry bills, save your hands save your clothes, that make Monday have its pleasure hours the same as any other day for all in the model basement. Some days of drudgery, hands that might otherwise be troubled by work and reddened by soapy water, can now remain soft and beautiful for these hands simply use electric buttons and presto the work is done. That is what makes The Bulletin's

JAPAN OFFERS NEW COURTESY TO FOREIGNERS

TOKYO, Sept. 9.—A new phase of Japan's foreign policy has developed with the issuance of instructions that visiting foreigners be treated with greater courtesy and subjected to the limitations of Japanese police surveillance.

The move commanded wide attention in the Japanese press and was greeted with a cheer by Foreign Minister Hiroshi Arima at the conference of prefectural government.

CITIZEN COMPLAINS
Complaints have been heard among foreign travelers in Japan to the effect that they are subjected to unwarranted treatment as a result of which they obtain an unfavorable impression of the country.

Such complaints have a regrettable effect on the foreign relations of Japan, it is believed by the Japanese authorities to guide foreigners to better understanding of Japan, and it is true that local government officials and particularly policemen who come into direct contact with foreign visitors will co-operate with the foreign office in this direction.

SUSPICION CALLED UNWARRANTED
"It is of course, not necessary that special courtesy be extended to those visitors because they have come from foreign countries. However, on the other hand, to subject them to over-critical surveillance or to look at them with suspicion because they are foreigners, is not warranted."

Rigorous measures should, of course, be taken in case they violate the law or act in a lawless manner. However, in the absence of concrete evidence does not conform to the standards of the nation.

Richard Nash, English dandy and master of ceremonies, the world has never known. He presided over the wedding of the young couple at Bath, famous watering place of the eighteenth century, and his work was law in the matter of deportment.

He made a real "Home of Tomorrow"—the use that is made of electric equipment in performing tedious tasks quickly and efficiently and the comfort, less labor and better health.

New Homes At Low Rents

First of 49 federal low-cost housing groups to be occupied by tenants, Teewood Homes, in Atlanta, Ga., shown in the upper air view, trim new brick apartment buildings replacing 11 blocks of city slums. Next leaves flunk each structure, garden spots are available for tenants and recreation space is provided. Below, left, is shown one of the eff-

iciently kitchens, electrically equipped, and at right is the central laundry for one of the apartment buildings, with every convenience. Rentals start at \$14.50 a month for a three-room apartment, as little as hundreds of Atlanta families pay for sub-standard dwellings. The new buildings are light and airy and all congestion is eliminated.

BUILDING A CISTERN
By Roger N. Whitman

Cistern water is very likely to be impure—to contain animal and vegetable matter that makes it unfit for drinking and cooking. This need not be the case; for water in a cistern that is properly built and cared for can be pure and healthful. The cistern itself should be of simple size, and so light that nothing can enter it except water. No water should be permitted to enter that is not pure.

I know of a cistern in a country house that has been providing pure water for upwards of 30 years. It is 14 feet deep and 12 feet in diameter, built of brick, and lined with a heavy coat of a mixture of one part of portland cement to two parts of clean building sand. The brick was wet at the time the coat was applied, and the coat was kept damp during three weeks of drying. This assured complete curing and full density. The upper part of the cistern walls were brought together, so that the cistern has the shape of a jug. The neck is square, 4 feet on a side, 6 inches thick, and is brought 8 inches above the ground level. Its top is covered with a light lid made of two thick pieces of cypress. In the center of this is a hole 6 inches square, in which a cypress vent 3 feet high is attached. The top of this is covered with a thickness of heavy linen.

Inside the cistern is a hollow copper pipe, a filter built of brick, about 12 inches high. The feed pipe to the house is connected into this filter. Water from the cistern seeping through the brick walls is cleaned of all dirt.

The cistern is of such size that one filling lasts the family for several months. The cistern is filled only twice a year; during the fall rains and snow, and the very early spring rains. Water comes from the slate roof of the house; but is not allowed to enter the cistern until enough rain has fallen for the thorough washing of the roof. Roof water at all other times is switched away from the cistern and used for the garden.

With no impure water allowed to enter the cistern, and protection against anything falling or blowing into it, the cistern water retains its purity.

METAL AND WOOD LATH

Question—Has metal lath any advantage over wood lath?

Answer—Yes, it has several. Being in latex and rigid sheets, while plaster is not likely to crack, while with wood lath, all of them will move in any settlement of the house. Wood lath will swell in moisture, causing the plaster to crack, while metal lath will not.

SQUEAKING PIANO PEDAL

Question—The pedal on my upright piano squeaks whenever I use it. How can I stop it?

Answer—Take out the front panel under the keyboard to expose the pedal and using a blunt put melted paraffine on all of the parts where the pedal and its rod touch other parts.

Woman's Spectacles

Struck By Lightning

REGINA, Sept. 9.—Lightning Saturday night struck the glasses from the face of Mrs. Robert Green-lan, in her farm home near Bismarck, southeast of this city.

During a severe electrical storm the lightning struck a telephone pole near the house, felling the pole and causing the glasses to be hurled through an open window.

The family were awaiting preparation of supper, and were stunned. Several poles were reduced to matchwood.

The new library at Cambridge, England, contains 1,200,000 books in 28 million of shelves. The shelves are arranged so that every book is within arm's reach of a man of average height.

FARM TAXES IN
U. S. REDUCED

WASHINGTON, Sept. 9.—A drop of 36 per cent in farm real estate taxes from 1920 through 1935 was reported today by the United States agricultural department.

A tax study, limited to farm lands taxed by states, counties, townships and other local units, disclosed the levies had been whittled down from an average of 58 cents an acre in 1920 to 37 cents last year. Nevertheless, the study showed the 1935 taxes were still about three times above the 1900 average of 12 cents an acre, and more than 50 per cent above the 1924 average of 24 cents.

Movie Fire Perils
At Revelstoke

REVELSTOKE, B. C., Sept. 9.—Flame spread swiftly through a building used by a British moving picture unit filming on location here yesterday.

Roy Emerson, British actor; Annette Criller, leading lady; and George King, producer, were

inside the frame building when made their way to safety. Some gasoline-soaked straw burlap in the frame building suffered a player jumped 35 feet from the minor hand injury at the time the fire broke out.

VITROLITE
The New Colorful
Structural Glass

You will have an opportunity to see this new and modern British building glass in the
"Home of Tomorrow"

- The walls of the bathroom are finished with White, Black and Pearl Grey Vitrolite.
- The walls of the kitchen are of White Vitrolite.
- The fireplace is finished with Tango Red Vitrolite.

VITROLITE
Is Stainproof, and never becomes marred by surface cracks or crazing. It comes in 16 beautiful colors—solids and two-tone effects.

**USES OF
VITROLITE...**

Vitrolite is in general use the world over... In industrial plants, especially those handling foods, it is used for walls and ceilings of laboratories, bakeries, dairies, and industrial lunch rooms, also for work tables. In hospitals it is used for many purposes, the operating room walls, in restaurants and recreation areas. It is used for wall facing, bench counters, soda fountains and table tops. It is especially effective for modern store front work and is being increasingly used for the facing of entire buildings.

A BEDTIME STORY

Story by HAL COCHRANE Pictures by GEORGE SCARBO

All of the Tines took a rest. Then Scully shouted, "Well, we'd better continue with our snowball war till someone yells, we quit." "I know our bunch will stick on through, no matter what the others do. Why, I could throw snowballs for hours, cause I am feeling fit." Then someone in the other fort cried back, "We also think it's

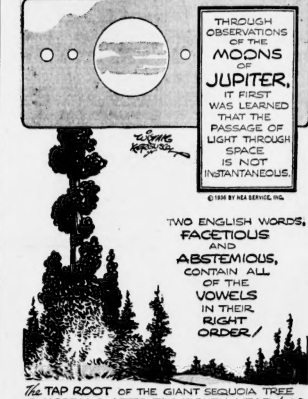

(READ THE STORY THEN COLOR THE PICTURE)

sport and if you think you're going to win, you're absolutely sure. "As long as our fort stands right here, we'll keep on fighting, never fear, and that will be a long time 'cause the fort is good and strong." "Well, hurry up," poor Duncy cried. "I don't care for this sort of ride. The water is too cold, or I would gladly swim to you." "I'll not until you find a plan, and hang on tight, as best I can. I'm rather worried, though, 'cause I don't see what you can do." "Okay, we've had our fight and now it's time to play. Now, let's just

TRANS-PACIFIC FLIGHT

BEHIND HERE TODAY
KAY DUNN, twenty young men, applied for a job as stewards on the Trans-Pacific Airways. The stewardesses recommended Ted Graham, veteran pilot of Trans-Pacific Airways, who is accepted for a trial.

Two other girls, DORIS LEE and ALICE WELLS, are accepted on the same basis.
Kay, excited over winning the job, went to tell Graham the news. He said he had to go to lunch himself and BENTON, personal chef, told him to go with the story.

CHAPTER III
KAY DUNN listened eagerly to the technical talk of planes and piloting as heard in the airport restaurant, laughing with Ted Graham and Charlie Benton, who felt that she actually had begun her new work as a stewardess.

At intervals pilots would stop at the table to speak to Graham, who introduced them to Kay. It thrilled her, too, to notice that passengers dining in the restaurant while awaiting the arrival of planes recognized Graham and nodded in his direction. Obviously they were wondering about the girl with the famous pilot.

After lunch Benton went back to his office and Ted took Kay on an inspection tour of the Central Airport. There was a terminal building, a large city hall-like building with a great city hall-like tower, a restaurant, cafe, hotel, post office, baggage room and shops all under one roof.

They climbed past the meteorological laboratories, to the roof. Kay looked down at the elaborate network of runways on the field. It was, Kay thought, like a patchwork quilt—the smooth, yellowish concrete runways intersecting at all angles. Benton was the concrete ramp where planes discharged and took passengers.

While they watched, a big twin-engine taxied up to the gate and stopped. Porter ran out, and helped the passengers to disembark. At another gate passengers were waiting to board the plane. Kay saw that the plane was being loaded with baggage and mail.

Slowly a passenger train crawled past the entrance gate, and taxis whizzed up and down the landscaped driveway to the terminal entrance behind. It was the ideal coordination of travel facilities on land, water and in the air. It was the most perfect symbol of the 20th century that Kay had ever seen.

Those are the hangars there," Ted said, pointing to a row of buildings. "They are the hangars for the planes. The doors are going up now. That's all done by electricity."

She turned to him and smiled. There was too much at the airport to take in at this first inspection. "It's nice of you," she said, "to show me all this. I don't know why you should. This morning when I came out here, looking for the job as stewardess on Trans-Pacific Airways, I'll admit I was a little afraid."

"I'm not surprised," Ted said. "Strange surroundings, new people. A new job in any line is a bit of a shock. The bright smiling Kay's eyes glowed. "I kept thinking about my brother who died in the air."

Ted touched her arm with a kindly gesture. "I flew in the war, too, but we—my observer and I—

had better look. We're all flying. And that was a long time ago."
Benton started out into the limitless space, and then Ted turned. "There's my plane," he said. "Right on the dot. I'll have to go down now. Will you come and see me off?"

"I'd love to," she said.
For the infinity of a second he gazed at her. At her reddish hair, hazel eyes and head back like a jockey in the racing outfit. "You are a strange creature," he said.

"Strange?"
"I don't know what it is. Excuse me. Something. Anyway—"
He drew her close to him, kissed her briefly, and then laughed. "That's hello and goodbye. That's the life of a pilot!"

Kay stood back, unconscious of his meaning. "Perhaps I'll be seeing you," she said. "In one of those ports of call. San Francisco, they say. Reno, or perhaps even that romantic isle of Guam. You're everywhere all the time."

He took her arm and helped her down the creaking stairs of steps to the waiting room, stopping long enough to point out the various decorations, depicting the progress of aviation. Then she stood at the gate, watching him stride across the concrete toward the waiting plane. How strong he was! When he turned to wave goodbye she saw the tan and blue, with its markings and danger, and then the flash of white which meant that he was smiling.

Suddenly Kay knew she would never forget that look of quiet resolution. She would never forget these hours with Ted Graham.

The plane rose, winging its way toward the west where for Graham the greatest of aviation's adventures—the trans-Pacific route—waited.

Kay turned and found the two girls, her companions of the morning standing nearby. They too, had watched the plane take off.

Alice Miller spoke first. "We made the grade," she announced. "We're going into training tonight."

"Where for you and when we found you were with Ted Graham? For a girl who came here looking for a job this morning, you work fast."

Kay said, a little sadly. "Well, never give me a thought again. He's the kind that's here today and gone tomorrow."

For a moment, all of them were silent, each busy with her own thoughts. Then Alice said, "I thought we were all to be passengers on a plane to New York. It's a training flight."

They were inspecting a new luxury liner, along with some tourists, when they saw two young men in uniforms stepping down from the plane. The men were talking in a confidential tone, but not too low for the girls to hear.

I understood they got three new stewardesses trying out on the ship. One of them said, 'I'd like to look at the girl who was with Ted Graham. I heard one of the men said, 'If you get a line on her, let me know.'"

"Sure thing," the other said and smiled.
The two men moved on and Kay and Alice passed anxious glances. Doris, however, was indignant. She touched her blond hair, and her pretty features took on a mischievous smile.

"You had looking, oh!" she stormed. "Listen, girl, let's organize for our mutual protection. We might as well call ourselves the Three Musketeers, and if the boys around the airport don't give us our rights, they'd better watch out!"

Kay laughed. "I guess you're right, though it looks safe enough around here to me."

Doris was adamant. "I know! My friend told I work in an instant within for two years."

Kay cried out with laughter. "Now this, stupid Doris went on. They may look romantic when they're dressed up for parade in flying tights, but they're just looking in their pockets and they like a good time. But she's the thing for you to remember. All and until one of them actually hauls you to a minister, and puts a line on your back, you're wedded to the air, too!"

(To Be Continued)

GOOD NEIGHBORS
"How do you like your new neighbors?"
"Great! They're the nicest, most unfriendly people you ever saw."

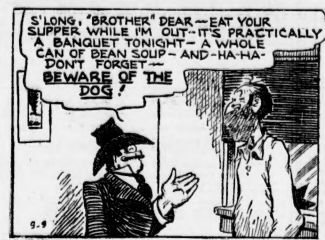

WRONG AGAIN
"My dear," said the husband, "if you hadn't taken so long dressing we should have been out of town."
"That's true," said the wife, "but I wouldn't have had to wait so long for the taxi."

Mal de Mer Kills
London Girl Swam
LONDON, Ont., Sept. 8.—Illness resulting from an attack of seasickness experienced while crossing the ocean, coupled with a touch of homesickness, was blamed for the death of one of the four royal swimmers who were in the water at a ball of London, Eng., to its namesake, London, Ont.

The swimmers were presented to the city last Tuesday by Sir Percy Vincent, Lord Mayor of London. The swimmers, who were believed to have escaped the dose of seasickness, were all well.

As much power goes over Niagara Falls daily as is contained in a day's mining of coal all over the world.

It is impossible to measure intelligence directly. The so-called "intelligence tests" do not pretend to measure intelligence but they do claim to measure various expressions of intelligence. They also measure a person's working habits and the degree to which he is motivated by the prizes in various lines. A person's intelligence is not a static quality but it is a dynamic one, and it is a quality that can be developed by the use of the mind.
